

Project Name: Michigan State University

Project Location: East Lansing, MI

Project Overview

Built in 1948, the Natural Science Building is a historic piece of the Michigan State University (MSU) East Lansing Campus. The College of Science promotes excellence in research, teaching, and public service across the biological, physical, and mathematical sciences. This project required additional focus on quality and preservation. Stonecreek and CiF Lab Solutions' advanced capabilities in engineering allowed us to effectively manufacture a custom product line requested by MSU architects.

- CiF Premium E-Line Red Oak Casework
- CiF Premium Custom Wood Tables
- CiF Custom Wood Built-ins for Metal Lockers
- CiF S-Line Metal Cabinets

Project Statistics

- Project Size: 2,300 sq. ft.
- Stonecreek Contract: \$65,330

Project Participants

- Architect: MSU Brandon Charland
- General Contractor: J. Perez Construction
