

**Project Name: BGSU Organic Chemistry Lab****Project Location: Bowling Green, OH****Project Overview**

Bowling Green State University welcomes a beautiful newly renovated organic chemistry lab. The new completely renovated space provides a modern teaching and learning environment for faculty and students. This fume hood intensive project features twelve state-of-the-art double sided clear glass Air Sentry fume hoods, and one additional ADA compliant hood. This space also features individually locked drawers below the fume hoods to accommodate all students during the semester.

- Fume Hoods
- Painted Metal Casework
